

# Beauty Treatment Charter

## At the Wellness Center

The aesthetic treatments offered are part of the overall care of the oncology patient.

The objective of the treatments is to offer a space of relaxation in order to help the patient to be reconciled with his or her body and to feel beautiful again, to better welcome the treatments and to face more lightly the side effects of these.

Care is provided;

- by professionals with experience in the field
- in a relationship of mutual trust
- in the respect of confidentiality and modesty
- in a safe environment where hospital hygiene is de rigueur and where gloves are sometimes necessary
- in a comfortable and serene environment
- with pharmaceutical grade products
- with the agreement of the referring physician if a particular situation arises
- in the respect of the framework and the schedule
