

Massage therapy charter

At the Wellness Center

The proposed massages are part of the global management of the patient in oncology.

It is not medical or therapeutic.

Soothing and energizing, this relaxation massage is done with fluid and enveloping movements. It helps release physical and nervous tension and provides a sense of unity and well-being.

Massages are provided;

- by professionals with experience in the field
- with a verbal exchange at the beginning and end of the massage
- in a relationship of mutual trust
- in the respect of confidentiality and modesty
- in a safe environment where hospital hygiene is de rigueur and where gloves are sometimes necessary
- in a comfortable and serene environment (musical background and essential oils in vaporization)
- with a pharmaceutical quality oil
- with the agreement of the referring physician if a particular situation arises
- in the respect of the framework and the schedule
